2017-03-23 Meeting notes

Date

⊞ 23 Mar 2017

Attendees

- Kathleen Carr
- Erich Reiter
- Chris Bond
- Cathy Fowler
- Scott Lewis
- Julia Collins
- Lauren Frederick
- Jon Pals

Goals

- Review previous action items
- Discuss NSIDC questions on mapping spreadsheet
- Discuss ⚠ CMR-2840 - JIRA project doesn't exist or you don't have permission to view it.
- Review existing tickets and prioritize
  - ⚠ CMR-3635 - JIRA project doesn't exist or you don't have permission to view it.
  - ⚠ CMR-3856 - JIRA project doesn't exist or you don't have permission to view it.
  - ⚠ CMR-3849 - JIRA project doesn't exist or you don't have permission to view it.
  - ⚠ CMR-3850 - JIRA project doesn't exist or you don't have permission to view it.
  - ⚠ CMR-3729 - JIRA project doesn't exist or you don't have permission to view it.
- Continue discussion of documentation
  - ⚠ CMR-3353 - JIRA project doesn't exist or you don't have permission to view it.
  - Validation
  - Translation

Discussion Items

Item	Notes
Rows 48-52 kind of confused me, althought I think 53-56 help clear it up (and make me wonder if 48-52 are just redundant?) Row 57 also seems redundant, and I'm not sure how they relate to rows 58-63 (I think the latter may be a separate "thing").	Rows 48-52 are su Rows 53-56 are de Spreadsheet is wri
I noticed that while the ISO MENDS column for rows 53-56 talks about where the various ISO stuff goes to be read properly, the ROLE is the most important part. I discovered, for instance, that if you put a contact at: /gmi:MI_Metadata/gmd:distributionInfo/gmd:MD_Distribution/gmd:distributor/gmd:MD_Distributor/gmd:distributorContact/[=> but specify the CI_RoleCode as "custodian", it will still read it and process it as an ARCHIVER, even though the Archiver row (55) doesn't list that as a place to look for Archiver.	

The spreadsheet seems to indicate that it will first try to find all but the originator role at: /gmi:MI_Metadata/gmd:identificationInfo/gmd:MD_DataIdentification/gmd:pointOfContact/gmd:CI_ResponsibleParty/	CMR will read Orig /gmi:MI_Metadata/
Then it says "Read if XYZ role didn't exist in #1 above"; however, if you include the data center in both that place and the "read if didn't exist" place, it will actually read from BOTH places (when I pull a DIF record, for instance, after ingest, it had two entries for ARCHIVER, one pulled from each place specified).	CMR will change to
In my tests, the DIF record doesn't show the role associated with the various Data_Center entries.	DIF 9 roles don't e DIF 10 does assig
The contact person associated with the various data centers doesn't seem to be read in; in the DIF, DIF10, and UMM pulls I did after ingesting, it leaves them as being "none".	Erich will look at th
Is it ok to have multiple archivers, multiple distributors?	ECHO can only ha NSIDC may want t to ECHO is straigh This may be more Currently, when CI and first processor

Action items

- [x] NSIDC to check code for Revision Date in ISO (related to CMR-2840)
- [ ] Erich Reiter Test combinations of Data Centers and Data Contacts to see if tickets need to be written
- [ ] All new tickets that come from this working group should have label of NSIDC Erich Reiter
- [x] Check how CMR maps multiple archivers to a single ECHO archiver? Lauren Frederick
- [x] Schedule a meeting for next week; we will cancel if not needed Kathleen Carr
